1.2.1 Determine the range of the rainfall for the November months.
1.2.2 Comment on the skewness of the data for the October months.
1.2.3 If the maximum rainfall for October was incorrectly recorded and is now increased, what effect will this have on
(a) the mean and
(b) the median.
1.2.4 For how many years was November's rainfall less than 64 mm ?
